

SUNDĀRI

notes to beautiful self
—
collections from
a journey

Finding beauty, requires balance.

note to beautiful self
—1—

*sundāri, in sanskrit:
beauty as an experience
and an endeavor,
not an object to attain.*

This is a journey that millions of women over thousands of years have taken. To the disappointment of some, it's not a magic potion. It's not surgical. It requires your presence. Which isn't easy in today's age. To begin, take a deep breath. And another. Exhaling—slower than the inhale—cleanses. Continue as long as you are able (even if only for a few short minutes between obligations). Your goal? To excise the day's holdings and replenish with fresh oxygenated blood. Only when your interior is at rest, are you ready to address what most consider the sole focus of beauty: the physical self.

People who use Sundāri consistently experience noticeable results. They seek, and achieve, beauty through balance—preventing the effects of premature aging, staying younger looking.

*sundāri is the goddess of beauty.
she is honored for her symmetry,
strength and grace.*

The goddess within.

In the Vedic tradition, that which we see is only part of the picture. Radiance isn't something that can be "applied twice daily." It comes from within. Inspired by the rich history of Ayurveda, and sister schools of yoga and holistic practices, our distinctive collection of Firming, Healing, Supplifying and Nurturing skin care products, is designed to inspire balance among mind, body and spirit. Sundāri is formulated to enhance what is naturally beautiful.
